DETAILED ACTION

Double Patenting

No obviousness-type double patenting rejection over U.S. patent applications 7153872 or copending application 11558624 are being made because the cited patent and application do not overlap in scope at R⁴ or R⁶ of the core. Furthermore, there are no species or guideposts pointing particularly to a fused ring system between R⁴ and R⁶ on the bicyclic ring. Thus, the obviousness-type double patenting was considered but not applied. The structural difference between the species of this application and the cited patents and copending applications means that they are patentably distinct.
